

β-tubulin

rev. 09/30/15

Cat#:EM0103

Product Type: Mouse monoclonal IgG, primary antibodies

Isotype: IgG1 **Clone ID:** 1-B11

Species reactivity: H, M, R, Zebra fish

Applications: ICC, WB, IHC, Flow Cyt

Molecular Wt.: 50 kDa

Description: Tubulin is one of several members of a small family of globular proteins. The most common members of the tubulin family are α-tubulin and β-tubulin. The beta-tubulin (relative molecular weight about 50 kDa) is counterpart of alpha-tubulin in tubulin heterodimer, it is coded by multiple tubulin genes and it is also posttranslationally modified. Heterogeneity of subunit is concentrated in C-terminal structural domain. Beta-Tubulin may have bound GTP or GDP. Under certain conditions β-tubulin can hydrolyze its bound GTP to GDP plus Pi, release the Pi, and exchange the GDP for GTP.

Specificity/Source

This antibody is produced by immunizing rabbits with a synthetic peptide (KLH-coupled) corresponding to β-tubulin.

Positive control:

NCCIT, NIH/3T3, PC12, Mouse heart, F9, Zebra fish brain, Hela
HepG2, Mouse brain

Subcellular location:

Cytoplasm → cytoskeleton

Recommended Dilutions:

WB: 1:5,000-1:10,000

ICC: 1:200 **IHC:** 1:20

FC: 1:50-1:100

Storage Buffer:

1*TBS (pH7.4), 0.5%BSA, 40%Glycerol. Preservative: 0.05% Sodium Azide.

Storage Instruction:

Store at +4°C after thawing. Aliquot store at -20°C or -80°C. Avoid repeated freeze / thaw cycles.

Purity:

ProA affinity purified
