

## ***CZ78:cf2Tg/+(AB)***

### **Nature of the transgene**

The *cf2Tg* allele was generated by random integration of pT2(elavl3:YC2) construct.

### **Genotyping assay**

1. Genotyping of the *cf2Tg* allele is based on the fluorescent microscope. As identified by fluorescent microscope, the YC2 fluorescence signal is detectable in neurons.

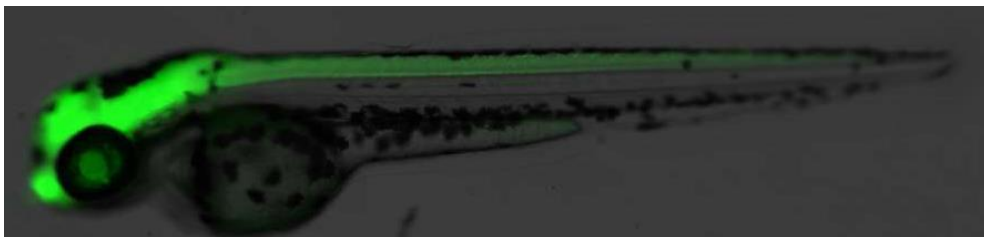

Figure. YC2 expression in neurons at 3dpf in *cf2Tg* line.
